APPENDIX III

[Vide answer to clause (*b*) to starred question No. 368 asked by Sri M. Jagannathan at the meeting of the Legislative Assembly held on 20th September 1958, page 346 supra.]

Recommendations of the Committee.	*Action taken by the Government.*
(1)	(2)
1. That the Government Milk Factory should work on the modified lines suggested as follows :—	
(*a*) that the factory should be under the control of the Government and must manufacture and supply toned milk;	1. (*a*) the Government have decided to run the Milk Factory under their control. The factory switched over to the production and distribution of toned milk from 1st July 1955.
(*b*) that its machinery must be improved and some of the machinery which is now not in proper working order should be replaced by new and improved equipment ;	(*b*) the Government have sanctioned the purchase of necessary new machineries for the Government Milk Factory.
(*c*) that better laboratory facilities on the premises should be available for the daily check of the quality of toned milk;	(*c*) Better laboratory facilities have been made available.

20th September 1958)

Recommendations of the Committee. (1)	*Action taken by the Government.* (2)
(*d*) that the employees should be properly instructed in regard to the sterilization of vessels and the process of bottling milk ;	(*d*) and (*e*) Necessary instructions have been issued.
(*e*) that the cans should be of such a nature that they can be automatically sealed by the machinery;	
(*f*) that for distribution, insulated motor vans should be made available ; and	(*f*) Two insulated vans have been purchased and they are in use.
(*g*) that the Government Milk Factory should also be the Store House for the skimmed milk powder which is proposed to be brought under the control of Government and all indents of consumers for milk powder should be supplied through the Government Milk Factory.	(*g*) The Government have decided that as the Committee was not in favour of compelling coffee hotels and other establishments to use skimmed milk powder, there need be no Government monopoly over the sale of milk powder which should be made freely available to the public.
2. (*a*) that a Milk Commissioner should be immediately appointed who will be responsible for the inspection of all centres where milk is brought from different centres, stored and distributed and enforce quality standards; for the inspection along with the Health Officer of the Corporation of all cattle sheds in the City and as per special legislation to be passed; for enforcing removal of such cattle from congested areas to the Milk Farms suggested elsewhere ; (*b*) that the Milk Commissioner should work in close co-operation with the Corporation and with the Co-operative Department, the Animal Husbandry Department and the Co-operative Societies established for milk supply and distribution.	2 (*a*) & (*b*) The Government have apppointed a Special Officer for milk and a Special Officer for Dairy and Milk Project to work under the control of the Director of Animal Husbandry. The said Officers are working in co-ordination with the Corporation of Madras and the Co-operative Department and are attending to work relating to formation of cattle colony at Madhavaram, Madras, and other allied subjects connected with the Scheme. The question of appointment of a Milk Commissioner will be taken up at a later stage.
3. That the Ayanavaram Milk Supply Union should continue to function on the following lines:— (*a*) that it must collect milk as at present but should arrange for transport through insulated motor vans ;	In pursuance of these recommendations a scheme, viz., "Hygienic handling of milk by Madras Co-operative Milk Supply Union" has been introduced in the Second Five-Year Plan.
(*b*) that as far as possible the mufassal centres where milk is collected should have proper facilities afforded for the cattle and for milking of the cattle in the presence of responsible persons ;	
(*c*) that the milk brought to the Ayanavaram Union from the different sources should be labelled and should be tested before such milk is pasteurised ;	
(*d*) that as in the Government Milk Factory, the milk cans must be properly cleaned and sterilised and sealed automatically before they are sent out for distribution ;	
(*e*) that the present method of utilising the cans with taps for retail distribution should be discontinued ;	
(*f*) that the staff should be properly trained in the process connected with the storage pasteurising and bottling or canning of milk ;	
(*g*) that as far as possible provision should be made in Ayanavaram for proper cattle-sheds and for pasture land where the cattle could graze.	

[20th September 1958

Recommendation of the Committee (1)	*Action taken by the Government.* (2)
4. That milkmen's colonies should be established in the outskirts of Madras City.	4. The Government have accepted in principle the need for the establishment of cattle colonies in the outskirts of the Madras City. To begin with the Government have sanctioned the establishment of a cattle colony at Madhavaram near Madras on an 600-acre plot for accommodating 4,000 milch animals during the Second Five-Year Plan period. Orders for the construction of necessary buildings for accommodating the first unit of 500 milch animals have already been issued and work has commenced.
5. (*a*) For the reasons stated in the report the Committee is not in favour of restricting coffee hotels and other establishments to use skimmed milk powder only ; (*b*) that the proprietors of coffee hotels however may be compelled to purchase milk only through one of these organised societies under conditions which would ensure proper care being taken in the supply of wholesome and clean milk.	5. (*a*) and (*b*) The Government have ordered that there need be no compulsion on hotels and that it may be left to hotel-keepers to use any milk they like in the hotels.
